Experience

CON EDISON (INVESTOR-OWNED UTILITY COMPANY)

SENIOR PRODUCT MANAGER | JUL. 2023-PRESENT

- Key architect of a comprehensive data privacy program across multiple holding companies, implementing a privacy SaaS platform with a custom-built system metadata retrieval integration.
- Leading initiatives such as data mapping & lineage and scanning data sources for privacy risks.
- Directed cross-functional working groups to deliver key privacy and security enhancements, including identity access management, privacy operations automation, and data classification standards.
- Coordinated testing scope and timelines for build cycles to ensure efficient execution.
- Engineered and implemented a suite of automated reports and dashboards to track program progress, identify key risk areas, and inform strategic decision-making.
- Curated strategic artifacts (e.g., wireframes, technical drawings, & process flows) to gain buy-in from executive leadership.
- Forged strong partnerships with cybersecurity, data governance, and vendor teams to deliver seamless integrations and ensure alignment on critical privacy initiatives.

ORACLE

SENIOR PRODUCT MANAGER | DEC. 2021-NOV.2022

- Managed a complex calculation engine, enabling large utility companies to accurately calculate energy costs, generate bills, and model scenarios.
- Directed the successful migration of the calculation engine to a modern, cloud-based customer care and billing system, enhancing scalability and efficiency.
- Refined the household selection data algorithm, improving data accuracy and system performance.
- Partnered with UX teams to define and implement user interface enhancements for a utility customer reporting tool, boosting usability and data accessibility.
- Restructured critical data attributes based on reliability measures, significantly improving data integrity and system robustness.

MORGAN STANLEY WEALTH MANAGEMENT

PRODUCT MANAGER, ASSISTANT VICE PRESIDENT | JAN. 2021-DEC.2021

PRODUCT MANAGER, ASSOCIATE | | MAR. 2019-JAN.2021

- Spearheaded strategic planning and budgeting for a multi-year initiative, leading to the successful sunset and rebuild of an account approvals platform.
- Directed the development and firm-wide rollout of a document review workflow, successfully meeting a tight regulatory deadline and ensuring compliance.
- Authored comprehensive backend requirements for unifying client and account data within the account approvals application, enhancing data architecture for strategic objectives.
- Conducted user focus sessions to identify critical pain points, define clear requirements, and facilitate the development of the platform's next iteration.
- Established key measures of success and developed corresponding analytics to guide the next iteration of the account approvals platform.
- Mentored and managed one Product Analyst, overseeing their contributions to the execution of the business unit's product strategy.

ENERGY ANALYST | PACE ENERGY & CLIMATE CENTER | JUN. 2017-FEB. 2019

- Drove sustainable solutions by conducting comprehensive market, policy, and quantitative analyses for companies in the Northeast.
- Provided critical technical and quantitative expertise for cross-disciplinary projects, developing data models, databases, and Python scripts to optimize analytical outcomes.
- Influenced policy development by co-authoring case studies and representing clients in state-level working groups and regulatory proceedings, resulting in successful testimonies and proposals.
- Led and mentored two rotations of four interns, guiding their contributions to key energy-policy projects.

RESEARCH ANALYST (CONTRACTOR), NORTH AMERICAN SOLAR | BLOOMBERG | JUN. 2016-SEPT. 2016

- Identified and reported on state and federal policy shifts affecting residential solar customers and utility companies, mainly proposed tariff structures.
- Published a case study on the applicability of New York's proposed full-value tariff structure in other markets.
- Assessed 38 corporate applicants for the Zayed Future Energy Prize using ESG and financial metrics.

BGS ENERGY (BIOFUELS STARTUP) |BUSINESS ANALYST & CO-FOUNDER| FEB 2014-AUG 2015

- Key contributor to planning and negotiations with investors, suppliers, engineering, & construction firms
- Assessed the impact of regional trade policies on entering new markets, such as the Caribbean energy sector.
- Delivered technical briefings to potential off takers, which secured non-binding commitments to purchase biofuels.
- Generated weekly reports on raw materials prices to establish a supply chain strategy for production planning.

Education

MASTER OF SCIENCE | 08/2015-11/2016 | UNIVERSITY OF STRATHCLYDE (UNITED KINGDOM)

- Major: Energy Management | Electives: Environmental & Mechanical Engineering

BACHELOR OF ARTS | 09/2011-05/2015 | PACE UNIVERSITY

- Major: Economics | Minor: Environmental Studies, French

CONTINUING PROFESSIONAL EDUCATION | 06/2018-12/2018| BOROUGH OF MANHATTAN COMMUNITY COLLEGE

- Program: Python Development (Objects, Classes, Pandas, NumPy, Matplotlib, APIs, Databases)

Skills & Abilities

- Python • Pandas • NumPy • Django • PostgreSQL • SQL • STATA • Cybersecurity • JIRA • OneTrust • Data Discovery • Agile • Microsoft • Writing
